

### GRA 310 File Naming Worksheet

To complete this worksheet, replace the bracketed text with the relevant information.

File Name	Good or Bad?	Explanation
index.html	good	Naming a file index.html is a universal standard that this is the first page of your website.
page_1.html	bad	This does not indicate the subject information of the page. Numbering pages in the file naming is not best practice and is hard to figure out what that page is used for.
menu,red'.html	bad	Adding a , or ' is bad practice. The characters may have different meaning to the browser and be interpreted differently.
web_names_good.html	good	If the content of the page is contained within the file naming and the spaces are replaced with underscores, then these are good practices.
PageTwo.html	bad	PageTwo.html is bad since the naming does not convey what the content of the page is.
page"1".html	bad	This is not a good name since it does not convey what the content of the page is and because the quotation marks may be interpreted differently by the browser.
my favorite web page s .html	bad	This example is bad practice because the spaces will be replaced with %20 when viewing the url address of the page. It is best practice to use hyphens or underscores to replace the spaces.
my favorite web pages .html	bad	This example is bad practice because the spaces will be replaced with %20 when viewing the url address of the page. It is best practice to use hyphens or underscores to replace the spaces.
red-page.html	good	This example is good because the naming gives an idea of what will be on the page and a hyphen is used to separate the two words.
page"1".html	bad	This example is not a good name since it does not convey what the content of the page is and because the quotation marks may be interpreted differently by the browser.
page-two.html	bad	This is not a good example because it does not convey what the content of the page is.
pagetwo.html	bad	This is not a good example because it does not convey what the content of the page is.
page_1	bad	This is not a good example because it does not convey what the content of the page is or have the .html on the end to be an html file.
page(2).html	bad	This example is not a good name since it does not convey what the content of the page is and because the parenthesis may be interpreted differently by the browser.
menu_red.html	good	This example is good because the naming gives an idea of what will be on the page and an underscore is used to separate the two words.
home<page>.html	bad	This example is not a good name because the tag keys may be interpreted differently by the browser.
